In this Lab

I created a GitHub repository containing:

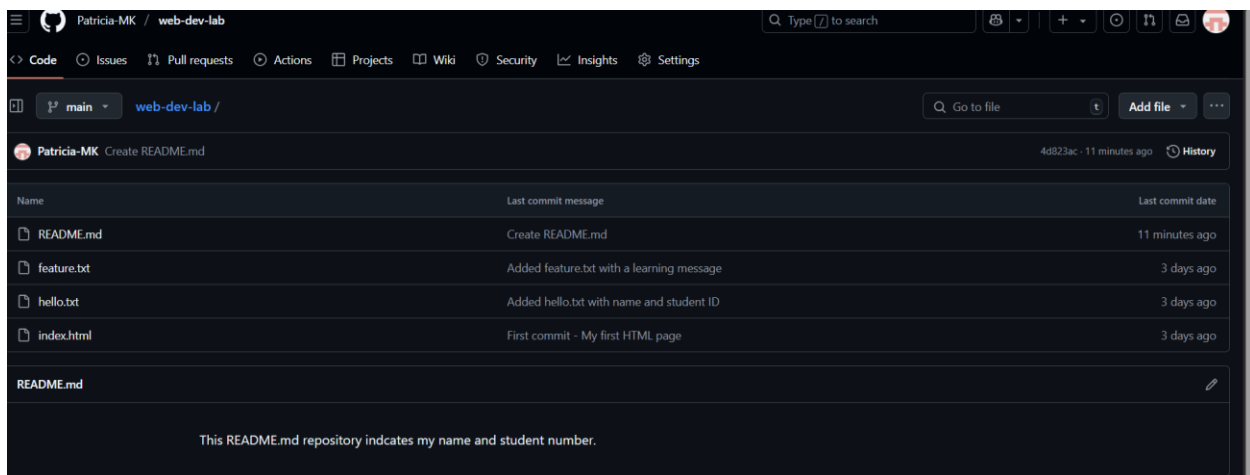

README.md with student names and a brief lab description

index.html (the file created during the lab)

The screenshot shows the GitHub interface for a repository named 'web-dev-lab' by user 'Patricia-MK'. The file 'index.html' is selected, showing its content in a dark-themed editor. The code is a basic HTML document with a title 'My First Web Page' and a body containing a welcome message and a paragraph about the first HTML page.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width,
6 initial-scale=1.0">
7 <title>My First Web Page</title>
8 </head>
9 <body>
10 <h1>Welcome to Web Development!</h1>
11 <p>This is my first HTML page.</p>
12 </body>
13 </html>
```

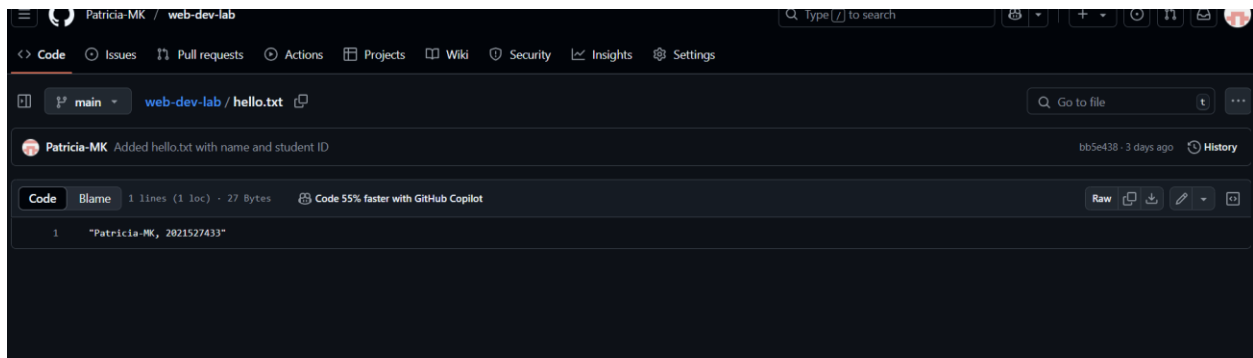

The screenshot shows the GitHub interface for the same repository, displaying the 'README.md' file. The file content is a brief description of the repository's purpose. Below the file content, a table lists the repository's commit history.

Name	Last commit message	Last commit date
README.md	Create README.md	11 minutes ago
feature.txt	Added feature.txt with a learning message	3 days ago
hello.txt	Added hello.txt with name and student ID	3 days ago
index.html	First commit - My first HTML page	3 days ago

Below the table, the content of the README.md file is shown:

This README.md repository indicates my name and student number.

I created and updated hello.txt with user.name and student ID.

I created a new branch (feature-branch) and added a file called feature.txt, writing a short message about what i learned.
